

SmartCalls - Symbian s60 version 3 Mobile App for VoIP

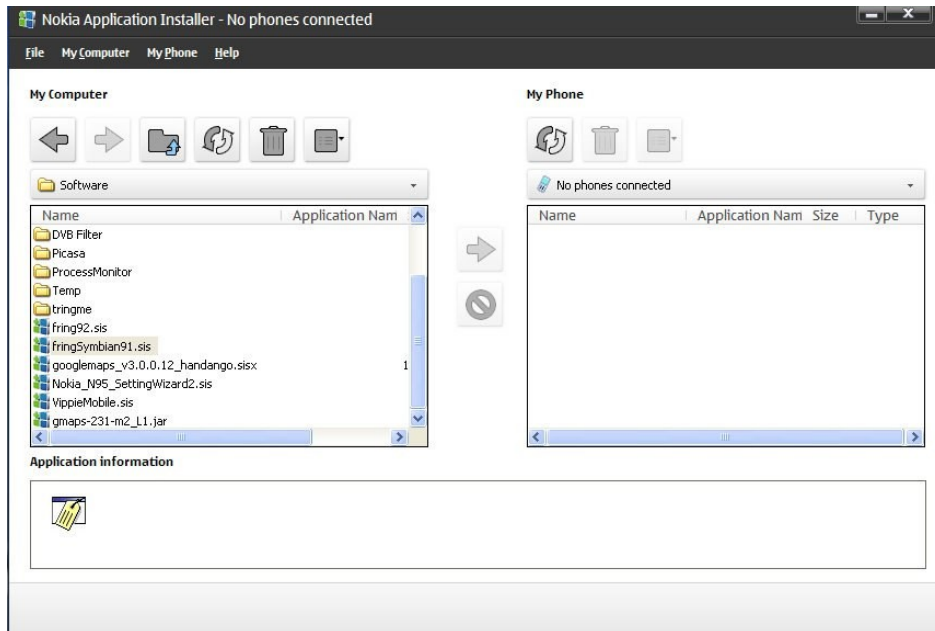

Installation instructions for SmartCalls:

1. Download SmartCalls software application and save in your PC (do not open file).
2. Install the Nokia PC Suite or the program that came with your mobile phone into your PC.
3. Open and run the Nokia PC Suite (see picture below).

4. Connect your PC with your mobile phone via the cables supplied or via Bluetooth or Infrared.
5. Select Application Installer from your Nokia PC Suite.

6. Locate and highlight the SmartCalls software application file in your PC with the Nokia PC Suite (you should see SmartCalls software application in the left hand side table below).

7. Click on the red arrow in the center of the Nokia PC Suite. You should then see the SmartCalls software application moved to the right hand side table.
8. Follow the prompts on your phone to complete the installation.
9. Reboot the phone.
10. After reboot, find the application SmartCalls in your mobile phone and open the application.
11. You will be asked for a connection method such as Wi-Fi or 3G. Select the appropriate connection.
12. In the application, select 'Call Settings'.
13. Enter Username and Password (sent to you earlier by email after successful subscription to SmartCalls).
14. Then 'Save'.
